ABOUT US

OUR COMPANY

Al Jabor Trading is an essential pillar of Al Jabor Group Holding and takes pride to claim to be one of the leading and front ranking organizations in Qatar.

Founded in the year 1958, Our Chairman **H.E. Sheikh Jabor Bin Mohammed Al-Thani** preserved a legacy of commitment, dedication, and quality of service that was passed through for over five decades and is keen to achieve continuous growth and expansion.

Al Jabor Trading takes pride to represent and be the sole agent of some of the world's renowned brands which covers every aspect of commercial and business activities of its field in Qatar.

At the root of the spectacular development that **Al Jabor Trading** has witnessed and earned ever-growing customers' trust over the years, the organization is engaged a quality product and services that provided by our highly professional employees who are trained to operate effectively under most rigorous and competitive environment.

DIVISION SPECIAL BUILDING MATERIALS

- Woods
- Fit-out & Interiors
- Waterproofing
- Fiber Cement Products
- Solid Surface
- Vinyl Flooring

Introduction

It is of great delight and pride to introduce our company **Al Jabor Trading - Special Building** Materials a new entry in the special Building and Construction materials with the hopes of establishing relationship with you and your organization.

During last three decade we **Al Jabor Trading** have substantially expanded our offering to the market. I therefore, enclose the details of our **Special Building and Construction products** offerings that can provide multiple solutions for your requirements

We stock and supply a wide range of products for new construction, remodeling and commercial applications including **Gypsum Boards & Accessories, Waterproofing Products, Cement Boards, Rockwool insulation, Ceiling Tiles Suspensions** and we have comprehensive stock of a whole variety of **Wood materials** for construction. All our products are imported from companies around the world renowned for high standards and excellent quality products.

All critical products / components being offered through us come with **genuine Manufacturer's warranty** & and are tested to respective standards governing the compliance norms. However, we place our customers' requirements at the forefront and can customize offering to match your needs.

We welcome the opportunity to support your organization in your efforts to **provide quality products**. We look forward to a close association and interaction with you in this regard.

Al Jabor Trading has endeavored to establish a business relationship that balances short-term gains with long-term considerations. We have been sensitive to customers' requirements & applicable regulatory requirements with vision to continual improvement. As a specialist, the strategy that exists within **Al Jabor Trading** consists mainly of professionalism and team work

Please let me know how we could be of more help; me and my TEAM look forward to a mutually beneficial relationship with your organization.

With personal regards
Al Jabor Trading – Special Building Division

Mission

We are committed to providing outstanding customer service, maintaining our high standards of quality product offerings and achieving an end result that we and our customers are proud of.

Al Jabor trading is a company that is built on trust, quality, reliability and accountability; we are professionals and take pride in our work and customer on.

Internal Audit Control

Procedures have been established which ensures that activities pertaining to the project are regularly audited against quality system standards. Audits are scheduled based on the status and importance of the activity and results of the previous audit.

All non-conformities discovered during audit are recorded and an audit report is prepared. The results of audits are communicated to the respective site managers who are responsible for timely implementation of agreed corrective action.

Training

Al Jabor trading ensures, where necessary, all employees are well qualified and trained / experienced, as appropriate to conduct the activities required of them by the Company.

Handling, Storage, Packing and Delivery

All materials, goods and products are handled in a way that prevents damages and deterioration during storage, processing and delivery. Appropriate equipment is used to transport materials from point to point. Designated storage areas are provided for incoming material, spares and finished products. The methodology of storage prevents damage or deterioration of products in the Company. The subsequent movement of material is controlled through the application of established procedures and defined authority levels.

Issue of receipt details of products are recorded to ensure that products used can be accounted for and to ensure that adequate stock levels are maintained. Where appropriate product is stored in a manner that facilitates issues on first-in first-out basis. All stores are periodically checked to verify the condition of the products in stock.

Quality Policy

We strive to achieve customer expectations in quality of our products and services as we ensure that client's expectations are realistic, achievable and clearly understood. We always respect confidentiality before, during and after all Projects.

Our Quality levels are maintained through an established & documented process and are implemented by incorporating Quality Management System thereby continually improving effectiveness.

Safety and Health in Work Place

Safety is our priority in path of productivity. We fulfill our commitment to society and the Environment by complying with all regulatory & statutory requirements

Our people are our most valuable asset and thus we are always aware of the safety and health at work.

Wood Panel

Al Jabor Trading - Special Building Material is one of the Qatar's leading importers and distributors of wood panels, offering an extensive range of panels for all types of wood works ranging from 0.6mm to 45mm in thickness including items such as Plywood, MDF, blockboard, Tubular chipboard, etc.

Al Jabor Trading - Special Building Material offers our range from a single sheet through pack lots, to full loads and customer specific requirements, available for collection or delivery.

Al Jabor Trading - Special Building Material constantly looking for new materials to complement our regular product range and to meet our client changing needs. Working with our suppliers, our development is constant, extending our range, sizes and source of raw materials.

In this guide, we list our standard panel range which is available in stock, however, the volume of our wood materials we are supplying grows on a monthly basis. If you have a special requirement, we will be happy to help you.

***"A business
committed to being
the best by
providing the best."***

Description	Thickness (mm)	Length (cm)	Width (cm)

Hardwood core – A/A Grade	12mm	244	122
Hardwood core – A/A Grade	12mm	244	122

Commercial Plywood

The standard plywood used for interior applications such as wall and floor structures, furniture and other uses where flatness and stability over time is required. All commercial plywood are A/A grade quality.

Description	Thickness (mm)	Length (cm)	Width (cm)
Polyester Plywood			
Polyester Plywood	3.6mm	213	91
Polyester Plywood	3mm	244	122

Polyester Plywood

Plywood overlaid with attractive polyester coating for use in interior applications such as furniture, wall and ceiling paneling.

Description	Thickness (mm)	Length (cm)	Width (cm)
Décor Plywood			
Beech Décor Plywood	3.6mm	244	122
Ash Décor Plywood	3mm	244	122

Décor Plywood

Plywood overlaid with attractive polyester coating for use in interior applications such as furniture, wall and ceiling paneling.

Film Faced Plywood

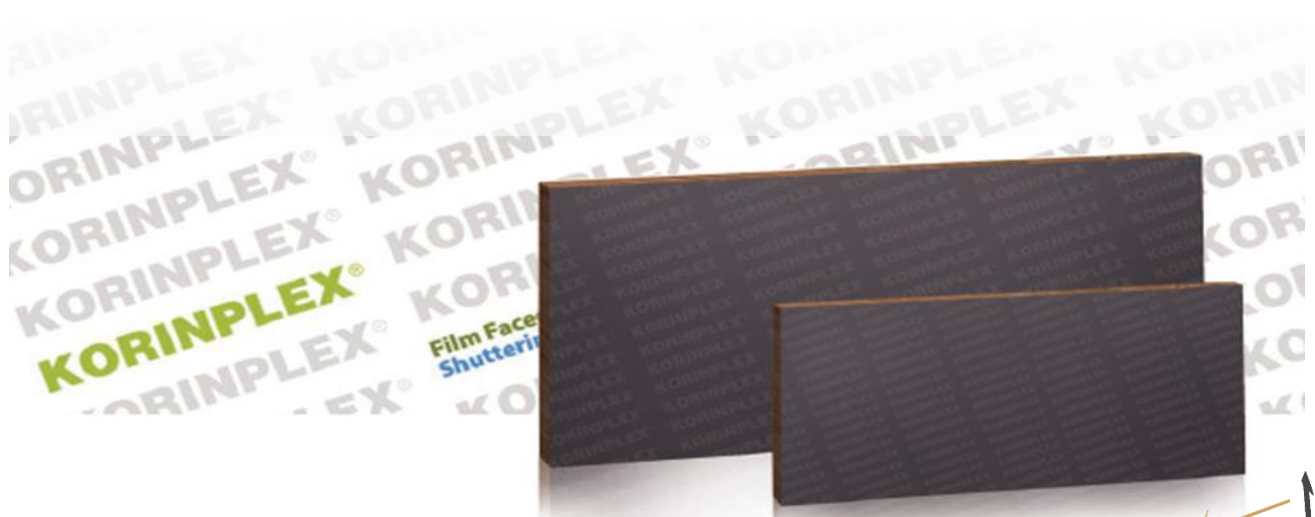

Korindo is a plywood manufacturer from Indonesia established since 1989 that has become the most reputable supplier of premium quality plywood in Middle East. It is manufactured from high quality logs, a skilled labor force and advance technology machines. Korindo strictly complies with ISO-9001 quality management system and can provide FSC chain-of-custody (CoC) certified plywood.

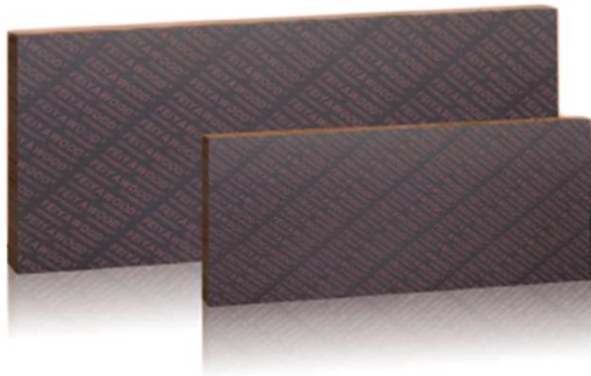

Korinplex® Film Faced Plywood is produced from hardwoods coming from Tropical Indonesian Forests.

Korinplex® is our superior quality film faced plywood developed specifically for concrete formwork. Thanks to its unique phenolic film resin, high quality cores and WBP gluing, Korinplex® can be used over 20 times with proper care and treatment.

Korinplex is available in two different grades:

- Korinplex® 18 mm/9 Plies
- Korinplex® 18mm/13 Plies
- Korinplex® reduces the absorption of moisture between concrete and plywood panels
- Korinplex® extends the framework's life by preventing the absorption of moisture through the surface
- Korinplex® is more economical as it can be used multiple times and reduces cleaning time

FYWOOD

FEIYAWOOD Co., LTD.

Established in 1996 in Jiangsu Province, China, **FeiyaWOOD** manufactures superior Film Faced Plywood developed specifically for concrete formwork. **Feiya** has put considerable efforts on the research and development of high-class salable film faced plywood since their inception. **Feiya** strictly complies with ISO-9001 quality management system and can provide FSC chain-of-custody (CoC) certified plywood.

FYWOOD Product Range :

- COMBICORE (6 Hardwood Layers)
- PLATINUM HARDWOOD CORE (11 Hardwood Layers)
- TROPICAL HARDWOOD CORE (11 Tropical Hardwood Lay

FYWOOD are premium Film Faced Plywood bonded with waterproof phenol resin (WBP) and overlaid on both sides with a phenolic film. **FYWOOD** panels are strong and homogeneous with an exceptional stability over multiple uses.

Block Board

Commercial Blockboard

Our blockboards are made with Indonesian Falcatacore allowing better stability and durability over time.

Description	Thickness (mm)	Length (cm)	Width (cm)
Com. Blockboard - Indonesian Falcata core			
Commercial Blockboard	18mm	244	122

Commercial Blockboard

Indonesian Falcata core blockboard with attractive polyester coating. Our polyester blockboard is suitable for internal applications such as furniture, wall and ceiling paneling.

Description	Thickness (mm)	Length (cm)	Width (cm)
Polyester Blockboard - Indonesian Falcata core			
Polyester Blockboard	3.6mm	213	91
Polyester Blockboard	3mm	244	122

Hardboard

Hardboard, also called High-Density Fiberboard (HDF) with a pre-finished hard surface that is ready to install. Unlike particle board, hardboard does not split or crack as it is denser and much stronger. Hardboard is suitable for furniture, wall panelling or ceiling lining.

Description	Thickness (mm)	Length (cm)	Width (cm)
Hardboard			
Hardboard	3mm	244	122

Plain MDF

Plain MDF (medium-density fibre board) is a uniform density panel with a fine and smooth surface ideal for Shaping and routing. **MDF** can be easily painted, cut, machined and cleanly drilled without splintering or chipping.

Our stocks a wide range of standard grade MDF, ranging from 2.7mm to 18mm in several sizes (4'x8'&6'x12'). also stocks E1 classified MDF for formaldehyde emissions.

Description	Thickness (mm)	Length (cm)	Width (cm)
Plain MDF			
Plain MDF	3mm	244	122
Plain MDF	6mm	244	122
Plain MDF	9mm	244	122
Plain MDF	12mm	244	122
Plain MDF	18mm	244	122
Plain MDF-E1 Grade	18mm	355	183

Dongwha® MDF is made from tropical hardwood species giving stronger board properties and minimizing surface defect during the lamination process. Consequently, the color of the panels will be darker compare to other MDF boards. The overall strength and smooth surface of Dongwha MDF make it suitable for painting and can be worked easily with all conventional wood working machines.

Masisa® MDF, from Chile, offer excellent finishes, lower wear and tear of tools and large savings on paint compared to other types of wood boards. Masisa® manufactures MDF with E1 classification for formaldehyde emissions.

Kronoply®

Made entirely out of debarked pine and spruce wood, **KRONOPLY MDF** (medium-density fiberboard), from Germany, excels with consistently high-quality fiber and a light color. This is a versatile, high-quality product for all applications for which solid wood and other wood-based materials are inadequate or unsuitable. It is also an excellently suited for drilling, milling, etc. KRONOPLY manufactures MDF with E1 classification for formaldehyde emissions.

Sawn Timber

Al Jabor Trading – Special Building Materials offers one of the most comprehensive range of softwoods and hardwoods available in Qatar. We take pride in sourcing from regions around the world that offers the best characteristics in each wood species we inventory.

Our softwoods range spans SPF whitewoods from Austria, Germany and Romania. Our hardwood range encompasses temperate and tropical timbers from across the world, including up to 20 species. In this guide, we list our standard species which are available in stock, however, the volume of sawn timbers we are supplying grows on a monthly basis.

European Whitewood

We keep in stock a wide range of SPF whitewood from Europe and we assure our customers of consistently high quality products from Europe.

Available sizes (Austrian, Romanian, German) A Grade

2x5x13Ft						
2x6x13Ft						

Ziegler® scaffold boards, from Germany, are designed specifically for scaffolding applications, offering maximum strength and durability and minimum wearing and splitting. **Ziegler® Scaffold Boards** are Kitemarked with BSI third party accreditation and graded to BS 2482:2009.

The **Kitemark** is a registered certification mark owned and operated by **BSI**. It is one of the most recognized symbols of quality, reliability and safety and offers true value to consumers, businesses and procurement practices. All boards are end-banded with iron bands and graded with British Standard 2482:2009S.

Scaffold Boards

Board size: 38 x 225cm | length: 3.9mtr .

Tubular Chipboard

Description	Thickness (mm)	Length (cm)	Width (cm)
Tubular Chipboard			
Tubular Chipboard	33mm	90	209
Tubular Chipboard	38mm	90	209
Tubular Chipboard	44mm	90	205,4

SAUERLAND Spanplatte manufactures wood-based materials to be used in modern interior doors.

As extruded tubular, SAUERLAND board meets the requirements for doors in residential and commercial buildings with respect to sound insulation, fire resistance, burglar-proofness and dimensional stability in different climates.

Like a bridge construction, **Tubular Core** provides an ideal combination of light weight and stability. Compared to solid boards, the weight of **Tubular Core** is reduced by up to 60%. This impressive fact proves that high quality doors do not have to be heavy!

Tubular and solid cores have a very low thickness swelling, which is unusual for wood based materials. This makes them particularly suitable for doors with delicate surfaces.

The special positioning of the particles guarantees a very high impact resistance: Doors with Tubular Core withstand even the greatest impact – in spite of maximum diameter of the tubes.

Hard Wood

Hardwoods are suitable for a large range of applications including construction, furniture and flooring.

Most of our sawn **hardwood** is kiln-dried and temperate at our warehouse so that they are fit for end use applications.

Our most popular grade is **FSA (First and Seconds)** as defined by **National Hardwood Lumber Association (NHLA)**. The FAS grade will provide the user with long, wide and clear cuttings. Best suited for high quality furniture, cabinetry, solid wood molding and applications where clear and wide boards are needed.

List of Hardwood

Afromorsia	Beech	Dabema/Dahoma	Iroko
White Ash	Black Cherry	Difou	Khaya (Anthotheca)

Light Red Meranti	Oak (red)	Oak (white)	Sapelli
Samba	Walnut		

Grade

Melamine & Laminate Boards

With the state-of-the art German machineries, technology and raw materials products are available in a vast range of contemporary modern decors & textures. There is a stringent quality control on the final product parameters ensuring that each final product delivered meets the specified quality norms laid out in the various international standards.

All melamine faced boards, laminates and edging products are available in the same decors to provide a perfect match finish.

We hold in stock a wide range of products but for special enquiry please ask for more details.

All Products come with the following specification unless indicated:

Melamine Faced Chipboards	Melamine Faced MDF	Decorative Laminates	PVC & Melamine Edge Band
18mm 244x122cm	3, 6 & 18mm 244x122cm	0.6, 0.8, 1 & 2mm Width:122 or 130cm Length:Custom length up to 4m (benefit: no wastage/optimum cost)	0.5x22mm

Decorative Laminates

MODEpal, standard grade laminates are suitable for most horizontal and vertical surfaces applications, Available in various textures and wide range of attractive colors. These laminates can be bonded by permanent adhesive like Urea, PAVc and other contact type glues. MODEpal are available in sheet forms of 0.6mm to 1.2mm thickness and a standard size of 122x244cm (Custom length up to 4m also available).

Melamine Faced Panel **(MDF and Chipboards)**

MODEpan, thermo-fused melamine faced pre-laminated MDF/Chipboard panels, these are excellent materials for horizontal and vertical surfaces. MODEpan provide a pre-finished hard surface that is ready to install, easy to maintain and is stain and scratch resistant. MODEpan is available in standard size of 122x244cm and thickness range from 3mm to 38mm (other lengths like 305x360cm are also available on request). These are also available in option 1-face melamine and 2-Face melamine for special application if required. MODEpan panels are used by the furniture industry for all types of home, office furniture and other interior and architectural work.

Melamine and PVC Edge bands

MODEedge, melamine and PVC edgebands matching to all panels as well as laminates colors and textures.

Bitumen Board

Jolly Bitulex Softboard is processed from cane fibre, the raw material tested and proven to provide the best resilience.

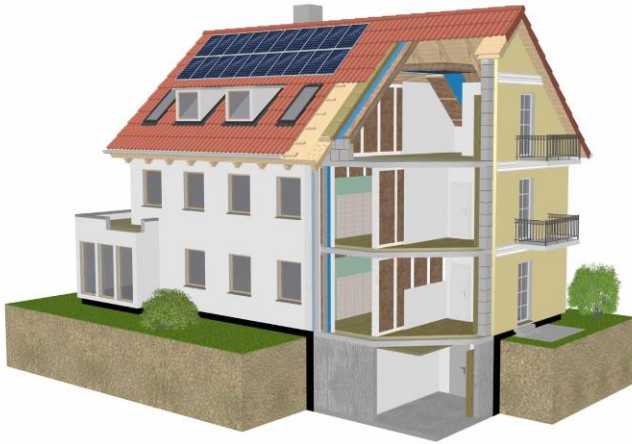

Impregnated with Bitumen in various percentages, it is a perfect base material for expansion joint fillers.

- Expansion joint filler strips in all concrete traffic surfaces like highways, airport, runways and streets.
- Expansion joint fillers in driveways, aprons, pavements, curbs, gutters and other concrete paving work.
- Expansion joint fillers in reinforced concrete structures like piers, retaining walls, and lateral supports like abutments.
- Expansion joint fillers are used against existing or between adjacent constructions and insets in concrete paving like drains, manholes, etc. Industrial Flooring.
- Various other internal finishes, flat works and concrete floors according to the state of art and local regulations

KNAUF Insulation

Mineral wool (Glass wool, Stone wool) is made of natural or synthetic minerals, which have great values in some industrial application like thermal insulation, filtration and soundproofing.

SAINT-GOBAIN GYPROC Drywall And Ceiling System

As the **world's leading manufacturer** and supplier of sustainable, innovative, lightweight interior building systems **Saint-Gobain Gyproc** sets the standard for dry lining, and through long standing collaborations with plastering and dry lining professionals this standard - the industry standard - is upheld.

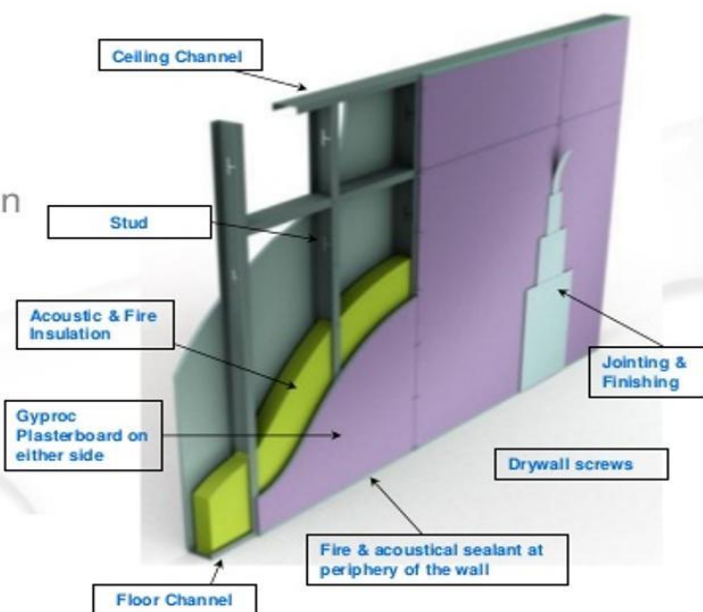

SYSTEMS & SOLUTIONS

Our systems have been purpose-designed by experienced technicians to meet the challenging needs of today's increasingly demanding buildings. Whether it is **straight forward partitions** or sophisticated shaft wall systems for **high speed lift shafts** - every aspect is taken into consideration, **from performance to speed and ease of instalation** - and from safe handing to the ready availability of components across Middle East.

WHAT IS A DRYWALL

- High performance **Light Weight** partition system
- GI frame, encased with Gypsum Plasterboards on either side
- Supported with drywall screws
- Joints are taped and finished with gypsum jointing compound

STOPER RAVAPROOF WATERPROOFING

Manufacturers of modified bituminous roofing / waterproofing membranes, Protection Boards and Bitumen liquids

ROOFING

A choice of plastomer or elastomer modified torch applied membranes for single or double layer applications

BASEMENT AND POOL TANKING

Full tanking with double layer plastomer or elastomer modified torch applied membranes or single self-adhesive membranes with protection boards.

BRIDGE DECK, CAR PARK AND RAMP WATERPROOFING

Direct asphaltting on single layer, double reinforced membranes featuring extra mechanical and thermal resistance.

PILE CAPPING AND FOOTING

Dressing with elastomeric torch applied membranes and self-adhesive membranes

WET AREA WATERPROOFING

Under tile waterproofing with single layer torch applied membrane or self-adhesive membranes.

CIVIL WORKS

Manhole waterproofing with torch applied, self-adhesive or bitumen paint or emulsion.

PIPE WRAPPING

Concrete and steel pipe protection with self-adhesive pipe wraps.

EVEREST INDUSTRIES

Since 1934, people have trusted Everest for making their most valuable asset - their homes, factories and warehouses. Today, we provide building products and building solutions for housing, commercial and industrial sectors. Our dynamic product line comprises a range of fiber cement products covering both roofing as well as boards. The durability and versatility of these eco-friendly products, makes them widely accepted in 25 countries in Asia, Africa, South Pacific and Europe.

Everest Industries Range of Product:

- * Fiber Cement Board
- * Solid Wall Panel
- * Smart Steel Building

“Everest Building Solutions. For Strength, Speed and Safety.”

Everest fiber cement boards provide creative freedom to architects and designers to focus more on aesthetics along with functional attributes. With Everest fiber cement board, you can create more innovative designs in finishes like wood/stone/brick... the possibilities are endless. These boards offer various advantages, from aesthetic appearance to durability when compared with traditional building materials. Everest fiber cement boards are available in the following variants:

- | | |
|-------------------------------------|----------------------------------|
| * Everest Multipurpose Cement Board | * Everest Designer Cement Boards |
| * Everest Heavy Duty Cement Boards | * Everest Colored Cement Boards |
| * Everest Rapicon Wall Panel | * Everest Cement Planks |

Hanex@ Solid surfaces is ideal for both commercial and residential applications, with its breakthrough stain, impact, and heat-resistance properties, with rich colors and patterns.

Hanex@ Solid surface is non-porous and NSF Certified

Hanex @ Solid surfaces maintains its original beauty for years. Most importantly, Hanex Solid Surfaces can be repaired and restored to its original condition, unlike other surfacing materials.

Benefits of this richly colored, durable, seamless surface that is also:

- Available in over 60 rich colors and textures
- Easy to fabricate and install with inconspicuous seams
- Scratch and stain resistant - easily maintained
- Highly durable - stronger than stone
- Resistant to heat, mold, chemicals, pollutants and bacteria
- Environmentally friendly - renewable and repairable
- Safe - tested and certified by the National Sanitation for Food Safety and Food Contact under the NSF 51 Certification
- Backed by a Residential and Commercial Limited Warranty
- CREENCUARD indoor Air Quality Certified
- CREENCUARD for Children & Schools

Hanex Solid Surface is easy to work with. It can be bent and shaped during fabrication and cut onsite with most standard saws. The wide variety of colors and patterns provide the characteristics that make it the perfect choice: an attractive, affordable, contemporary surface that can stand up to heavy traffic and day-to-day use.

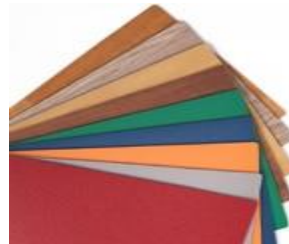

“MADE TO PERFECTION”

Natroyal Group is India's leading manufacturer of Vinyl Flooring, Coated Fabrics, Rigid Films, Circular and Warp Knitted Fabrics and Seating Components.

The **Vinyl Flooring** is marketed under the brand name '**Royal House**'.

Our **Vinyl Flooring** thickness ranges between 0.40 mm to 3 mm with various application such as Education, Healthcare & Wet areas, Residential, Offices Retail & Hospitality and Transport.

Wet Areas

Our flooring provides a healthy and hygienic environment to patients to enhance the healing and curing elements for a speedy recovery. The care givers receive aid in providing the same with ease and experience comfort in the work place. The Flooring is also designed for bare foot and continuous wet areas

Residential

Our exquisite range of vinyl floor coverings in wooden, geometric and all over designs is developed keeping in mind the various tastes of individuals for designing their homes. It is easy to maintain and hassle free installation helps its users to change their interiors as often as desired. Flooring category includes printed flooring for normal economical range and Royal Star, Moonwalk, Majesty, Opera, Symphony, Royal Classic etc.

Offices/Retail

Where aesthetics meet practicality, our various ranges are designed to meet the growing aesthetics demands of the guests/ customers in offices, retail and hospitality. It also meets the high performance requirement at the same time.

Transport

Various range of high endurance transport Vinyl Flooring are designed to meet the high Safety standards, provide a hygienic, comfortable and attractive environment to passengers. Pioneers of introducing Vinyl Flooring ranges like Gripper, Suprema RS, Standard RS, Sonata and Ecoplus V of International Standards for the Transport Industry in India.

Healthcare

Our flooring provides a healthy and hygienic environment to patients to enhance the healing and curing elements for a speedy recovery. The care givers receive aid in providing the same with ease and experience comfort in the work place. The Flooring is also designed for bare foot and continuous wet areas.

Education

Our Education range of Vinyl Flooring is developed to help students concentrate, inspire and interact. The vibrant colors enhance creativity and concentration for both the students and facilitators.

Hospitality

Where aesthetics meet practicality, our various ranges are designed to meet the growing aesthetics demands of the guests/ customers in offices, retail and hospitality. It also meets the high performance requirement at the same time.

ZTFLOOR®

As one of the largest access floor manufacturers and exporters in China, every year, **ZTFLOOR** supplies over 2 million square meters of access floor in commercial office buildings, data centers, educational facilities, the casinos, clean rooms and libraries.

The company is expanding, with plant area over 60,000 square meters and 200 staffs. The main products include access floor system, data center products, underfloor air conditioning and underfloor wiring.

ZTFLOOR leverages its 25+ years of experience in the industry to provide support to customers by its high efficiency, energy conservation, intelligence and green spaces products.

- **Steel Cementitious Panel**

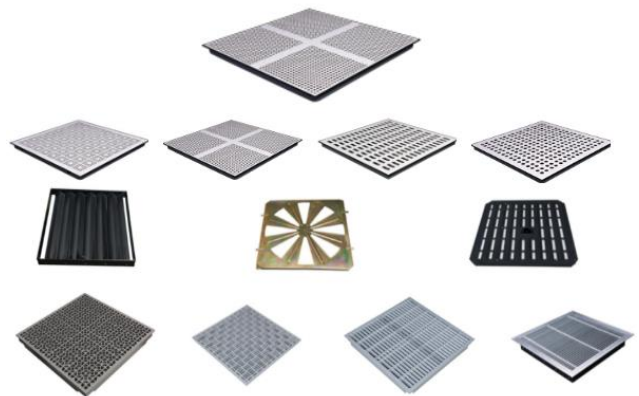

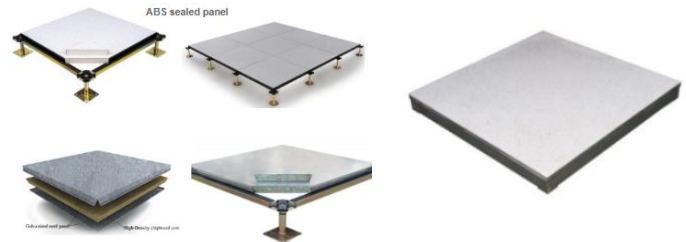

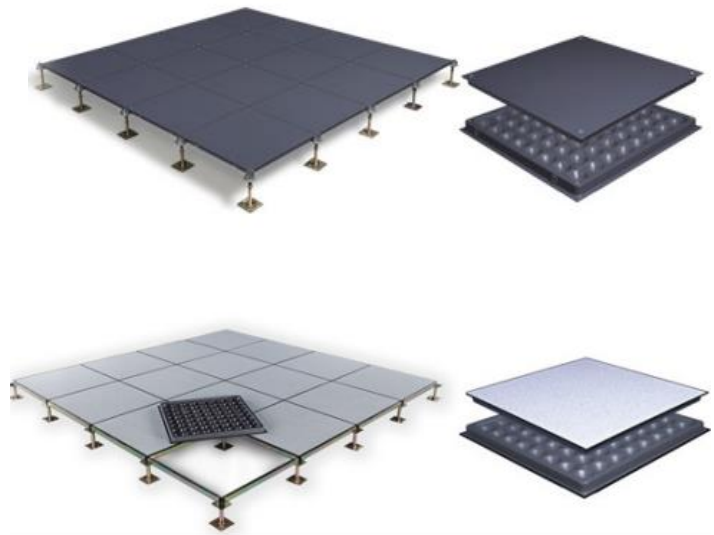

(ZT50 OA Panel, Zt50-B Panel, Laminated Panel)

- **Calcium Sulphate Access Floor**

(Encapsulated Panel, ABS Sealed Panel, GRC Floor, FRC Floor)

- **Woodcore Access Floor**

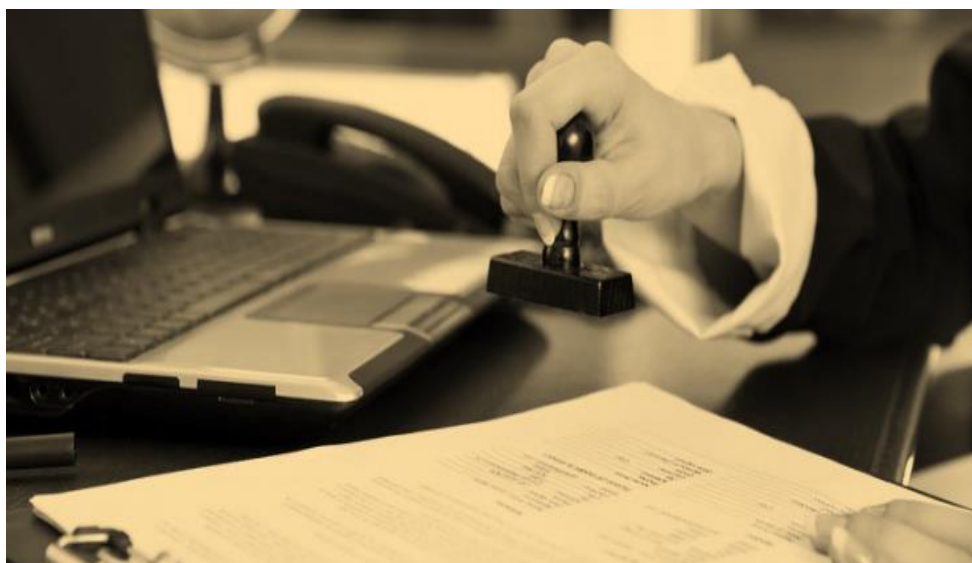

(Encapsulated Panel, ABS Sealed Panel, Aluminum Access Floor, Aluminum Honeycomb Anti-Static Panel, Floor Accessories, Under Structure Accessories, Air Flow System, Covering Material)
